

OLABODE OGUNFUYE

SENIOR TECHNICAL PRODUCT MANAGER

olabode.ogunfuye@gmail.com | +234 810 069 4808 | LinkedIn: [@olabodeafrica](#) | Lagos, Nigeria

[Click to View Portfolio](#)

PROFESSIONAL SUMMARY

Product and transformation leader with 12+ years of experience building and scaling technology products across financial services, government, healthtech, and logistics in West and Central Africa. Known for operating at the intersection of product delivery and people change, consistently delivering not just features, but the adoption programmes, stakeholder frameworks, and operational structures that make products actually work. Holds a Lean Six Sigma Black Belt, Professional Scrum Master (PSM I), and a First Class degree in Computer Science. Practical about methodology: uses what works, not what sounds impressive.

SKILLS

Domain Expertise: Fintech, HealthTech, RegTech, GovTech, PropTech, EduTech, Business Process Optimisation, Process Re-engineering

Tools: JIRA Advanced Roadmaps, Confluence, Linear, Figma, Miro, Adobe XD, Balsamiq, Power BI, Tableau, Microsoft Clarity, Google Analytics, Python, SQL, Firebase A/B Testing, MS Project, SharePoint, Azure, Git, Zapier, Prosci ADKAR Framework

WORK EXPERIENCE

API Product Manager, [Pierflow](#) - Lagos, Nigeria

Contract, January 2025 – Present

- Architected Pierflow's API-first healthcare connectivity platform end to end: designing the Records API, Insurance Distribution API, HMS Integration layer, and FHIR R4 data standardization pipeline to connect HMOs, hospitals, fintechs, and payers through a single canonical API.
- Authored the full technical specification for Pierflow's Paper-to-Digital (P2D) Engine: covering scanner device integration (eSCL, TWAIN, WIA, ISIS), AI-powered OCR and LLM extraction pipeline, and a RESTful HMS import API enabling partners such as LinkHMS to pull validated, FHIR-ready patient bundles at up to 6,000 records per day.
- Led partnership development at World Health Expo Lagos 2026: researched and ranked 150+ exhibitors, produced a structured partnership playbook, and initiated active conversations with Healthcare Federation of Nigeria, SYNLAB Nigeria, GE Healthcare West Africa, PharmAccess Foundation, and SANEForce, converting a live LinkHMS pain point into a structured pilot agreement.
- Defined Pierflow's embedded insurance distribution model: embedding affordable HMO plans natively inside fintech and banking apps through a single API and presented the product concept successfully to Africa Health-Tech Accelerator (co-hosted by Africa CDC) and Accelerate Africa.

Lead, Banking Product Management & User Experience, [Inlaks Limited](#) - Lagos, Nigeria

Full-time, January 2020 – Present

- Expanded CPay across Liberia and Sierra Leone: scaled from single-country deployment to five government MDAs across two countries, generating over \$1M in revenue through structured adoption programmes, stakeholder sequencing, and super-user networks.
- Built the adoption programme from scratch alongside the product: ran guided onboarding sessions using real transaction types, established 30-day post-launch check-in cycles to catch friction early, and designed audit-ready reporting that gave finance officers confidence before reliance was required.
- Identified and closed a \$400,000 revenue gap: investigated recurring payment errors and fraud patterns, led the design of a BBAN Validator and Account Mapper that resolved the root cause and secured a contract with the Central Bank of Liberia.
- Repositioned a government tool as a SaaS product: evolved the Audit Management Information System for Sierra Leone's government from a one-off delivery into a multi-tenant platform with a \$30M five-year revenue target.

- Led the Health Insurance Management build for SUNU Health: spent significant time with operational teams before writing a single requirement; product decisions were driven by what client-facing staff needed across 17 countries.
- Designed and delivered Treasury Single Account Management System for Sierra Leone's Ministry of Finance, restoring institutional confidence and materially improving financial oversight.
- Directed cross-functional teams of up to 12 across six-year product programmes with very low staff turnover; built an internship pipeline that brought in early-career talent without increasing headcount costs.

Product & Growth Manager, [SpireCore \(Taxspire\)](#) - Lagos, Nigeria

Contract, October 2025 – May 2026

- Built Nigeria's first accessible digital tax compliance platform from zero: five live modules (tax registration, business registration, invoicing, advisory booking, TCC retrieval) shipped in six months with a two-engineer team, generating ₦25M+ revenue in the first month of launch.
- Designed the end-to-end compliance user journey, mapping every lifecycle stage from LIRS tax identity registration through SME business registration, filing, invoicing, and advisory, creating a platform where each module cross-sells and retains into the next.
- Drove product-led growth strategy: implemented Microsoft Clarity for behavioural analytics, designed WhatsApp-to-platform user migration flows, and integrated Google Calendar advisory bookings at highest-intent product moments.
- Led team building from scratch: recruited and onboarded UI/UX designers, a product manager, a tax advisor, and an accountant partner; ran structured sprint cycles with daily standups and weekly strategic reviews.
- Served as founding strategic advisor to management: daily sessions covering compliance architecture, role-based access controls, partnership agreements, and near-term roadmap including fintech API integrations and payroll module.

Product & Transformation Lead, [Porchplus](#) - Lagos, Nigeria

Contract, January 2020 – May 2025

- Delivered the Porchplus MVP across web and mobile: took the product from concept to 35,000+ installations, establishing market presence and onboarding multi-unit landlords within the first year.
- Designed a multi-channel rent collection system: automated reminders and payment flows across WhatsApp, SMS, email, and in-app, significantly reducing manual follow-up for property managers.
- Ran Agile delivery end-to-end: sprint planning, backlog grooming, and iteration reviews across payments, tenant services, and operations, giving the team a predictability it lacked before.
- Standardised operational processes across markets: documented property onboarding, tenant management, and service delivery workflows that previously lived in people's heads, the groundwork for scaling beyond Lagos.
- Integrated PiggyVest wallet APIs: extended the platform's financial services capability, giving users more reasons to stay within the product rather than going off-platform for payments.

Product Manager, [Vatebra Limited](#) - Lagos, Nigeria

Full-time, April 2016 – December 2019

- Led all phases of HMIS product development, from ideation and discovery through compliance sign-off and launch, ensuring alignment with local and international health regulations in collaboration with legal and clinical teams.
- Spearheaded CI/CD implementation using Jenkins, reducing product release turnaround time by 40% across multiple deployment environments through a structured process improvement initiative.
- Managed stakeholder relationships across clients and internal teams, facilitating alignment on product vision, roadmap, and deliverables that drove successful outcomes and increased market share.

Business Analyst, [Parkway Projects Limited](#) - Lagos, Nigeria

Full-time, December 2014 – March 2016

- Conducted market trend and user requirements analysis, identifying product enhancement opportunities that contributed to measurable gains in customer satisfaction.
- Developed detailed BRDs and functional specifications, ensuring clear communication of project requirements to development teams and reducing product defects.
- Facilitated business case presentations to senior leadership, supporting successful product launches through structured cross-functional communication.

ADVISORY & CONSULTING

Product & Venture Advisor, [Luminevent.com](#) - Lagos, Nigeria

2023 – 2026

- Provide end-to-end product advisory across ideation, product design, execution, and early-stage growth strategy for a live event-tech platform.
- Work closely with the founder in structured weekly syncs to refine product direction, prioritise features, and align execution with market feedback.
- Support MVP scope definition, UX design decisions, and early go-to-market approach, shaping a clearer product-market fit trajectory.

Product Advisor, iSendApp (Logistics) - Lagos, Nigeria

2021 – 2022

- Defined MVP scope and product strategy for a logistics startup, focusing on user workflows, operational feasibility, and market entry positioning.
- Supported go-to-market planning and early product iterations that contributed to 1,000+ users and improved retention across initial user cohorts.

EDUCATION & CERTIFICATIONS

BSc. Computer Science, First Class Honours, Crawford University - Nigeria

October 2013 – 2017

- Best Graduating Student, Department of Computer Science
- Hackathon Finalist, Bells University 2013

[Professional Scrum Master I \(PSM I\)](#), Scrum.org — April 2023

[McKinsey Forward Online Learning Programme](#), McKinsey & Company — December 2022

[User Experience Design](#), Accenture — July 2022

[Enterprise Design Thinking Practitioner](#), IBM — May 2020
