PROFESSIONAL SUMMARY

Product and transformation leader with 12+ years building and scaling technology-driven products across financial services, government, healthtech, and logistics in West and Central Africa. My work sits at the intersection of product delivery and people change, I have consistently found that the hardest part of any deployment is not building the thing, but getting people to actually use it.

At Inlaks, I led CPay's expansion across Liberia and Sierra Leone, growing from one country to five government MDAs and $1M+ in revenue, not through features alone, but through structured adoption programmes, stakeholder sequencing, and super-user networks. At SpireCore, I took Nigeria's first consumer tax platform from blank page to ₦25M in its first trading month, operating simultaneously as product lead, growth strategist, and team builder. At Porchplus, I have led product delivery and process transformation for a property management platform across multiple markets, driving 35000+ installations and building the operational frameworks the business now runs on.

I hold a Lean Six Sigma Black Belt, a Professional Scrum Master certification, and a First Class degree in Computer Science. I am practical about methodology, I use what works, not what sounds impressive.

PROFESSIONAL EXPERIENCE

Product & Growth Manager, SpireCore (Taxspire) *Oct 2025 – Present*

Founding product lead for Taxspire - Nigeria's first digital-first tax compliance and business management platform for SMEs and entrepreneurs.

- **Built Nigeria's first accessible tax compliance platform from zero:** five live product modules (tax profile registration, business registration, invoicing, advisory booking, and TCC retrieval) shipped in six months with a team of two engineers, generating ₦25M+ in revenue within the first month of launch.
- **Designed the full compliance user journey:** mapping every lifecycle stage from individual tax identity registration (LIRS) through SME business registration, filing, invoicing, and advisory, creating a platform where each module feeds the next as a cross-sell and retention engine.
- **Drove product-led growth strategy:** implemented Microsoft Clarity for behavioural analytics (heatmaps and session recordings), designed WhatsApp-to-platform user migration flows, and integrated Google Calendar advisory bookings directly into product modules at highest-intent moments.
- **Led team building from scratch:** recruited and onboarded UI/UX designers, a product manager, a certified tax advisor, and an accountant partner for business registration; ran structured sprint cycles with daily standups and weekly reviews.
- **Operated as founding strategic advisor to management:** two hours of strategic sessions daily covering compliance architecture, role-based access controls, partnership agreements, and a near-term roadmap including fintech API integrations and a payroll module.

Lead, Banking Product Management & User Experience, Inlaks Limited *Jan 2020 – Sep 2025*

Led product strategy, UX, and change management across flagship government fintech and healthtech deployments in West and Central Africa.

- **Expanded CPay across Liberia and Sierra Leone:** took the product from single-country deployment to five government MDAs across two countries, generating over $1M in revenue. The commercial outcome was a direct result of how we structured the rollout: sequencing MDAs deliberately, training super-users before wider launch, and giving ministry directors weekly visibility into adoption rates within their teams.
- **Built the adoption programme from scratch alongside the product:** for each MDA deployment I ran guided onboarding sessions using real transaction types (not hypothetical scenarios), established 30-day post-launch check-in cycles to catch friction early, and designed audit-ready reporting that gave finance officers confidence in the system before they were asked to rely on it.
- **Identified and closed a $400,000 revenue gap:** noticed recurring payment errors and fraud patterns that nobody had formally named; led the design of a BBAN Validator and Account Mapper feature that resolved the root cause and secured a contract with the Central Bank of Liberia.
- **Repositioned a government tool as a SaaS product:** the Audit Management Information System I built for Sierra Leone's government was scoped as a one-off; I worked with leadership to evolve it into a multi-tenant platform with a $30M five-year revenue target.
- **Led the Health Insurance Management build for SUNU Health:** spent significant time with operational teams before writing a single requirement; the product decisions were driven by what client-facing staff actually needed to do their jobs better across multiple African markets.
- **Designed and delivered Treasury Single Account Management System:** for Sierra Leone's Ministry of Finance; the system restored institutional confidence and improved financial oversight materially.
- **Directed cross-functional teams of up to 12:** across six-year product programmes with very low staff turnover; set up an internship pipeline that brought in early-career talent without increasing headcount costs.

Product & Transformation Lead, Porchplus *Jan 2020 – Present*

Concurrent engagement, leading product delivery and operational transformation for a multi-market property management platform.

- **Delivered the Porchplus MVP across web and mobile:** took the product from concept to 35000+ installations, onboarding multi-unit landlords and establishing the platform's initial market presence within the first year.
- **Designed a multi-channel rent collection system:** automated rent reminders and payment flows across WhatsApp, SMS, email, and in-app, reducing delays and manual follow-up for property managers significantly.
- **Ran Agile delivery cycles end-to-end:** sprint planning, backlog grooming, and iteration reviews across payments, tenant services, and operations; the cadence gave the team predictability it didn't have before.
- **Built the onboarding and engagement framework:** designed the landlord and tenant onboarding flows, wrote communication templates, and put in place the feedback loops that let the team see where users were dropping off and why.
- **Standardised operational processes across markets:** documented property onboarding, tenant management, and service delivery workflows that had previously lived in people's heads; this was the groundwork for scaling beyond Lagos.
- **Integrated PiggyVest wallet APIs:** extended the platform's financial services capability, giving users more reasons to stay within the product rather than going off-platform for payments.

Product Manager, Vatebra Limited *Apr 2016 – Dec 2019*

Owned the full product lifecycle for a proprietary Health Management Information System (HMIS) serving Nigerian healthcare providers.

- **Led all phases of HMIS product development:** from ideation and discovery through compliance sign-off and launch, ensuring alignment with local and international health regulations via collaboration with legal and clinical teams.

- **Spearheaded CI/CD implementation using Jenkins:** reducing product release turnaround time by 40% across multiple deployment environments through a structured process improvement initiative.
- **Managed stakeholder relationships across clients and internal teams:** facilitating alignment on product vision, roadmap, and deliverables that drove successful outcomes and increased market share.

Business Analyst, Parkway Projects Limited *Dec 2014 – Mar 2016*

Supported product launches through market analysis, requirements documentation, and cross-functional stakeholder facilitation.

- **Conducted market trend and user requirements analysis:** identifying product enhancement opportunities that contributed to significant gains in customer satisfaction.
- **Developed detailed BRDs and functional specifications:** ensuring clear communication of project requirements to development teams and reducing product defects.
- **Facilitated business case presentations to senior leadership:** supporting successful product launches through structured cross-functional communication.

ADVISORY & CONSULTING

Product & Venture Advisor, Luminevent.com *2023 – Present*

- Provide end-to-end product advisory support across ideation, product design, execution, and early-stage growth strategy for a live event-tech platform.
- Work closely with the founder in structured weekly weekend syncs (2–3 hours) to refine product direction, prioritise features, and align execution with market feedback.
- Support decision-making around MVP scope, user experience design, and early go-to-market approach, helping shape a clearer product-market fit trajectory.

Product Advisor, iSendApp (Logistics) *2021 – 2022*

- Helped define MVP scope and product strategy for a logistics startup, focusing on user workflows, operational feasibility, and market entry positioning.
- Contributed to go-to-market planning and early product iteration cycles post-launch.
- Supported initial traction efforts that led to 1,000+ users and improved retention across the first user cohorts through iterative product feedback and refinement.

VOLUNTEERING

Program Manager, Codespark Foundation (Africa Code Week) *2015 – Present*

- 3x Google Grant Award Winner (2017–2019), coordinated schools, government agencies, and corporate sponsors including SAP; secured yearly sponsorships of $4,000 for flagship coding education programmes.

EDUCATION

BSc. Computer Science, First Class Honours, Crawford University, Nigeria *Oct 2013*

Best Graduating Student, Department of Computer Science
Hackathon Finalist, Bells University 2013

CERTIFICATIONS

Professional Scrum Master I (PSM I), Scrum.org	Apr 2023
McKinsey Forward Online Learning Programme, McKinsey & Company	Dec 2022
User Experience Design, Accenture	Jul 2022
Enterprise Design Thinking Practitioner, IBM	May 2020
Certified Lean Six Sigma Black Belt (LSSBB), LSSBC (APMG)	May 2019
Financial Model & Valuation Analyst (FMVA), CFI	Expected Dec 2025
Product Strategy, Kellogg Executive Education	Expected Oct 2026

CORE SKILLS & TOOLS

Product & Strategy: Product strategy, Roadmapping, OKRs, Product Battle Card Development, Zero-to-One product development, SaaS, Product-Led Growth (PLG) & Monetization Strategy, AI-Enabled Product Strategy,

Domain Expertise: Fintech, RegTech, HealthTech, EduTech, PropTech

Change Management: Adoption Programme Design, Stakeholder Mapping & Sequencing, Super-User Networks, Training delivery, Change communication

Process & Delivery: Agile / Scrum / Kanban, Sprint Facilitation, CI/CD, Lean Six Sigma (Black Belt), DMAIC, Process Re-engineering

Customer Experience: Customer Journey Mapping, Service blueprinting, UX research, Design thinking, Voice of Customer, NPS / CSAT

Data & Analytics: Power BI, Tableau, Microsoft Clarity, Python, SQL, NumPy, Pandas, Google Analytics

Tools: JIRA Advanced Roadmaps, Linear, Confluence, Linear, Figma, Miro, Adobe XD, Balsamiq, MS Project, SharePoint, Azure, Git, Prosci ADKAR Framework tools, Loom, Firebase A/B Testing, Zapier, n8n, OpenClaw, Claude.
